

Boudoir vs. *Pin-up*

Trying to decide which style of shoot is best for you? Though they are both very flirty and sexy they are each their own style. Boudoir photography celebrates and showcases the beauty and femininity of women. It can be sensual, romantic and even risqué. Pin-up photography, while also showcasing the female form, does so in a very fun and vintage stylistically themed way. Typically these shoots have hair, make-up and wardrobe from the era they represent.
